

Principal Naval Architect, Structures - London - £80K

An offshore engineering and marine warranty company requires a Principal Naval Architect specialised in structures. You must have experience managing large projects related to offshore energy projects and marine warranty surveying.

Principal Naval Architect, Moorings - London - £75K

An established offshore oil and gas consultancy requires a Principal Naval Architect to act as a subject matter expert in relation to moorings. You will have considerable experience in the analysis of ship hydrodynamics and mooring analysis for FPSO projects.

Naval Architect - London - £35K

Award-winning, innovative marine technology company requires a junior Naval Architect (2-4 years' experience). You must have design and analysis experience with large vessels and be familiar with Shipyard visits.
